## Bachelor of Science

The La Sierra University Zapara School of Business develops leaders who create value and make a difference and enlarge human understanding of business and society. The School's curricula emphasize workplace spirituality, social entrepreneurship, and ethics. The focused study of these themes as part of the business curriculum fosters intellectual development and expands students' moral and spiritual horizons. Immersion activities simultaneously express its commitments to excellence in the School's areas of distinctive competence and provide students with the chance to develop appropriate habits and skills.

**CAREER OPPORTUNITIES AND RELATED OCCUPATIONS:** Finance graduates usually begin their career by one of the following routes: (1) an internship program (2) clerical positions in bank insurance and corporate entities, or (3) administrative assistants. After the acquirement of basic experience, leadership positions are open to those who demonstrate the capacity to assume responsibility.

Currently positions are open in the health-care industry, banks, and corporations. State and local governmental agencies have many openings for finance graduates in a variety of fields. Career options include Actuary, Attorney, Business Valuator, Financial Analyst, Financial Planner, Foreign Exchange Trader, Manufacturing Executive, Stockbroker, and Venture Capitalist.

**EDUCATIONAL QUALIFICATIONS:** Most positions require a bachelor's degree. A number of fields of study provide appropriate preparation, including accounting, economics, finance, statistics, and mathematics. For advanced positions, employers often require a master's degree in business administration (MBA) or a master's degree in finance. Knowledge of options pricing, bond valuation, and risk management are important.

**JOB OUTLOOK:** Employment of financial analysts is projected to grow 12 percent from 2014 to 2024, faster than the average for all occupations. A growing range of financial products and the need for in-depth knowledge of geographic regions are expected to lead to strong employment growth.

**SALARY:** The median annual wage for financial analysts was \$80,310 in May 2015. The lowest 10 percent earned less than \$49,450, and the highest 10 percent earned more than \$160,760.
