- HLSC 120 Lifetime Fitness (2)

**UNIVERSITY STUDIES SERVICE-LEARNING (3 courses)**

*A maximum of 4 units from major and 8 units of major cognates can be applied to General Studies. For more information, consult 2016-2017 Undergraduate Academic Bulletin.

**NOTE:** A student's general education and major degree program must meet the minimum 190 units required for graduation; the student must complete elective units to make up the deficiency.
The Bachelor of Science degree in Health Care Management is designed for the student who wishes to combine the study of business with preparation for admission to post-baccalaureate study in one of the health professions. While incorporating core requirements for admission to medical and dental school, it also features a lean array of business courses (including Health Care Management and Fundamentals of Health Care Finance) designed to equip students to understand the business environment within which a private professional practice operates and the business vocabulary and issues they will need to comprehend in order to navigate the increasingly complex world of managed health care.

CAREER OPPORTUNITIES AND RELATED OCCUPATIONS: Job opportunities will be good, and applicants with work experience in the healthcare field and strong business management skills should have the best opportunities. Medical and health services managers will continue to be needed as medical facilities and medical practices become larger and more complex. Competition for jobs at the highest management levels will be keen because of high pay and prestige.

EDUCATIONAL QUALIFICATIONS: Medical and health services managers typically need at least a bachelor’s degree to enter the occupation. However, master’s degrees are common and sometimes preferred by employers. Graduate programs often last between 2 and 3 years and may include up to 1 year of supervised administrative experience in a hospital or healthcare consulting setting. A student who wishes to qualify for admission to a post-baccalaureate health professional degree program should verify and plan to meet all relevant field-specific and institution-specific requirements, which may include the completion of classes in addition to those listed here.

JOB OUTLOOK: Employment of medical and health services managers is projected to grow 17 percent from 2014 to 2024, much faster than the average for all occupations.

SALARY: The median annual wage for medical and health services managers was $94,500 in May 2015. The lowest 10 percent earned less than $56,230, and the highest 10 percent earned more than $165,380.
