POLITICAL ECONOMY  
*Bachelor of Science*

The La Sierra University Zapara School of Business develops leaders who create value and make a difference and enlarge human understanding of business and society. The School’s curricula emphasize workplace spirituality, social entrepreneurship, and ethics. The focused study of these themes as part of the business curriculum fosters intellectual development and expands students’ moral and spiritual horizons. Immersion activities simultaneously express its commitments to excellence in the School’s areas of distinctive competence and provide students with the chance to develop appropriate habits and skills.

**CAREER OPPORTUNITIES AND RELATED OCCUPATIONS:** The bachelor’s degree in political economy is designed primarily to prepare students for the advanced study of economics, with a focus on its political context and implications. It would also provide useful preparation for careers in or the advanced study of areas including law, political science, public policy, and urban and regional planning. Opportunities are significant for persons working as lawyers, economists, political scientists, and urban and regional planners. Additional pursuits include working as an analyst in marketing, research, and finance.

**EDUCATIONAL QUALIFICATIONS:** Most economist jobs require an advanced degree, but some entry-level jobs are available with a bachelor’s degree, including jobs with the federal government. Most who complete a bachelor’s degree in economics find jobs outside the economics profession as research assistants, financial analysts, market analysts, and similar positions in business and finance.

Most urban and regional planners have a master’s degree from an accredited urban or regional planning program. Aspiring urban planners with a bachelor’s degree but not a master’s degree can qualify for a small number of jobs as assistant or junior planners. Candidates with a bachelor’s degree typically need work experience in planning, public policy, or a related field.

Political scientists need a master’s degree or Ph.D. in political science, public administration, or a related field. Jobseekers with a bachelor’s degree in political science usually qualify for entry-level positions in many related fields. Some qualify for entry-level positions as research assistants, others as policy analysts for research organizations, political campaigns, nonprofit organizations, or government agencies. Many go into fields outside of politics and policy, such as business or law.

**JOB OUTLOOK:** Employment of economists is projected to grow 6 percent from 2014 to 2024, about as fast as the average for all occupations. Employment of urban and regional planners is projected to grow 6 percent from 2014 to 2024, about as fast as the average for all occupations. Employment of political scientists is projected to decline 2 percent from 2014 to 2024.

**SALARY:** The median annual wage for economists was $99,180 in May 2015, for urban planners $68,220, and for political scientists $99,730.
